PerfilStar S.A. has always pursued the objective of quality products, introducing the necessary technological improvements.

We perform most production processes internally such as molding, digital printing, the wrapping or the packaging which allows us to check that the product is delivered with the highest quality and perfectly adapted to customer needs.

We customize the collections of laminate flooring, laminated wood or vinyl adjusting on the sample design of the flooring.

We also have a collection of metal and lacquer that can be combined with any design of flooring.

Quality

History

Perfilstar S.A. was founded in 1994 although has extensive experience over 40 years in the manufacture of moldings. Perfilstar S.A. is one of the leading producers of accessories for laminate and wood flooring in Europe.

With a start in Montcada i Reixac making products for the kitchen, we are currently located in Barbera del Valles near Barcelona (about 20 minutes) and have facilities of over 2,000 square meters easily accessible from the motorway AP-7, which connects directly to Europe.

Since Perfilstar SA is a family company the human capital is very important for us, this is why within our workers you will find people that have developed their professional career in Perfilstar.

Our company have a team who works to give an answer to any kind of question that you can have.

PerfilStar S.A. is a company concerned with environmental sustainability, which is why we always buy from suppliers who have the international environmental certification such as FSC or PEFC.

Perfilstar S.A. has undertaken the implementation of the green dot symbol for recycling products are intended for final consumer. In addition to the separation of waste for treatment, the company places great emphasis on the reuse of materials and their correct use to avoid waste generation.

Environment

For the sector of wooden platform can work with any wood veneer and on the other side for the laminate flooring industry have more than 1000 decorative papers. We also work with our own digital printer allows us to copy any design of timber, fantasy, ceramic, vinyl or logo, without any limitation.

Our profiles are made based on: MDF, MDF waterproof, finger-jointed pine, aluminum and PVC compact.

According to the bonding requirements can use EVA or PUR glue line. All lacquers and varnishes are highly resistant to the constraints posed by the parquet industry.

Flexibility

One of the main pillars of the company has always been the adaptation of technology to our manufacturing processes, all production lines are fully automated to enable the operator to devote his attention to quality control.

Only done manually process wood packaging products that need an accurate visual inspection in the piece by piece for being a living material.

In Perfilstar S.A. we are constantly investing in new equipment such as digital printer allows us to guarantee the quality of our products.
